SYSTEM )

DECLARATION OF ZE'EV DRORI

Ze'ev Drori hereby states as follows:

1. I am the inventor of the invention of the subject patent application.

2. I hold a Bachelor's Degree in Applied Mathematics with a minor in electronics engineering, awarded in 1966. I am the president of Clifford Electronics, Inc. ("Clifford"), the assignee of this invention. Although I have the title of President, most of my time is spent on defining new products and new systems architectures, and various engineering projects.

3. I have read the declaration of Carl Angotti. I have never met Mr. Angotti, nor have I ever talked or communicated with him. While, according to the background information in his declaration, he has some work experience not related to the design of microprocessor controlled vehicle security systems, his experience in the design of microprocessor-controlled systems as of September 8, 1987, seems typical of the skill of the design engineers employed by Clifford at that time.

4. It is my firm belief and opinion that my patent application adequately describes to a person skilled in the art as of September 8, 1987, how to make and use my invention. After all, the use of microprocessors in the control of

electronic systems was well known at that time, and persons skilled in the art were well versed in the programming of microprocessors to carry out the control functions.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.

Dated: 12.2.94
